

Eliézer Jäger received his Msc degree (2006-2008) in Pharmaceutical Sciences at the Federal University of Rio Grande do Sul – Brazil, and in 2015 he completed his PhD (2010-2015) in Macromolecular Chemistry at the Faculty of Natural Sciences of the Charles University (Prague, Czech Republic). After his PhD he was awarded with a Czech Academy of Science Grant for postdoctoral studies (2016-2018) at the Department of Tumor Immunology, Radboud Institute for Molecular Life Sciences (Nijmegen, The Netherlands). Currently, Eliezer Jäger is a senior research scientist at the Institute of Macromolecular Chemistry, Academy of Sciences of the Czech Republic and his main focuses are on the development of tumor microenvironment responsive (pH, temperature, ROS) and non-responsive polymer materials - drug delivery systems (micellar nanoparticles, soluble polymers, block-copolymer conjugates, polymersomes). He has published about 60 papers in impacted journals with more than 2000 citations (h-index 25, Google Scholar).
