

Priv.doz. DI Dr.mont. Florian Josef Arbeiter

Affiliation: Montanuniversitaet Leoben, Materials Science and Testing of Polymers

Florian Arbeiter is currently employed as a post-doc at the Chair of Materials Science and Testing of the Montanuniversität Leoben. He holds a doctoral degree in Polymer Engineering and Science, as well as a *venia docendi* for „physics of polymers“. His main focus are the mechanical properties of polymers, as well as their fracture and deformation behaviour with a focus on multi-layered polymers, produced via additive manufacturing, as well as conventional processing methods, such as co-extrusion or hot pressing. He has authored and co-authored more than 70 peer reviewed publications.
