

Dr. Ema Žagar received her PhD from the Faculty of Chemistry and Chemical Technology at the University of Ljubljana in 1999. She started working at the National Institute of Chemistry, Slovenia in 2000 and since 2013 she is the head of the Department of Polymer Chemistry and Technology. Her current research interests are comprehensive polymer characterization using various liquid chromatographic techniques and polymer recycling. She is (co-)author of 123 peer-reviewed papers, two granted patents, and four patent applications.
