

Prof. Stepan Podzimek works as a scientific consultant for Wyatt Technology. In addition to his position at Wyatt Technology, he is also working as a head of the Department of Analytical and Physical Chemistry at a Czech R&D company SYNPO, and holds a professorial position at the Institute of Chemistry and Technology of Macromolecular Materials in the Faculty of Chemical Technology of the University of Pardubice in the Czech Republic. He has been working in the field of polymer analysis and characterization for over 40 years. His research interests include methodology of the characterization of the molecular and chemical structure of synthetic and natural polymers by size exclusion chromatography, asymmetric flow field flow fractionation, liquid chromatography, and viscometry of dilute polymer solutions. In particular, he has focused on the characterization of branched polymers and structure-property relationships. He is an author or co-author of over 60 scientific papers and the author of a book entitled "Light Scattering, Size Exclusion Chromatography and Asymmetric Flow Field Flow Fractionation" published by Wiley.
